## 5. **A500 CLEANSING OPERATIONS**

The Streetscene Manager (Operations and Performance) presented a report regarding issues of cleansing of the A500 and the avenues taken to address the on-going problem of litter and cleansing operations

A partnership approach had been undertaken with Amey on behalf of the Highways Agency who carried out traffic management and grass cutting, while Stafford

Borough Council, Stoke-on-Trent City Council and Newcastle-under-Lyme Borough Council undertook the cleansing operation. This covered the complete length of the A500 from junctions 15 to 16. The cleansing included all partners putting in resources inclusive of labour, vehicles, plant and equipment

Earlier in 2014 Officers noted that grass cutting works were being undertaken on the A500 without prior knowledge of Newcastle-under-Lyme Borough Council's Streetscene Operations Section. The outcome was that litter had been cut up by mowing machinery leaving a huge cleansing operations on either side of the carriageway. This resulted in the time being taken to clear the debris of 949.5 hours

A Member asked if litter varied at different times of the year. The Streetscene Manager (Operations and Performance) confirmed it did, particularly during the winter months as vegetation dies down. The Streetscene Operations Service had been replacing the single wheelie bin type with Broxap double bins to help address fly tipping issues. This is an on-going project where budgets can accommodate

The Executive Director for Operational Services advised communications with the Highway Agency are still on-going to pursue compensation for additional costs

**RECOMMENDED:-** That the report be received

**6. INTEGRATED RECYCLING AND WASTE SERVICE JULY 2016 (PRESENTATION BY THE HEAD OF RECYCLING AND FLEET SERVICES)**

The Portfolio Holder for Environment and Recycling introduced the proposed Integrated Waste and Recycling Service. A Cabinet Panel was established March 2013 and carried out a number of site visits including to Stockport and Cheshire West to look at potential options on the collection service. Visits to treatment plants were also carried out by the Panel

A decision is needed by September 2014 as to how the new service will be operated to allow sufficient time for the procurement of vehicles, treatment contracts, round planning, working patterns, infrastructure works and final detailed design of the new service

A Consultation exercise ran to 14 April 2014 and the outcome of this had been fed into the service design process. A report is to be submitted to Cabinet on the 23 July 2014. The new service will commence July 2016

The Portfolio Holder for Environment and Recycling thanked the Head of Recycling and Fleet Services and the Officers involved for their hard work
