12. Lone Working Review

A corporate working group has been established to undertake a review of lone working arrangements. The first meeting of this group took place in September attended by staff representatives from all service areas and Trade Unions. As part of this ongoing review, Business Managers have completed a lone working survey which has helped to populate risk assessments and safe working procedures. Using these documents Business Managers will then be asked to complete a specific lone working risk assessment which will assess the adequacy of their existing controls and help us to identify if further control measures are needed such as lone working devices.
During this review period, Business Managers have been requested to review their lone working risk assessments to ensure that they reduce the risks associated with lone working.

13. Climbing Wall Audit

A Health and Safety audit of the Climbing Wall at Jubilee 2 was undertaken in June 2015, which led to a temporary closure of the climbing wall whilst some of the recommendations were implemented. A comprehensive action plan was put into place and the majority of the actions have been completed.

14. Accident / Incident Procedures

Work is underway in producing guidance documentation for employees who would respond to incidents. The documents will provide guidance for employees on what actions need to be taken in response to an accident and also guides Business Managers and Heads of Service through the Accident Investigation Procedure.

15. Training Needs Analysis

Operational Services (Streetscene) are currently in the process of undertaking a training analysis review of health and safety training. They have recorded all historical health and safety training records, which will help to identify any training needs required. This will be rolled out across the organisation.
