- 7 AUG 2018		
PASSED TO	CONFER WITH	CIRC TO

86, Old Butt Lane  
Tacke  
ST 7 INR  
4<sup>th</sup> Aug 2018

Dear Sir,

Madam I am writing to state my appreciation of the tree protection order on the land adjacent to our house.

This land is probably the oldest part of Old Butt Lane. We know that cottages were further along from the land, by the brook in the 1850s.

We also have proof that families lived in that area and found employment at Finley Hall. My husband's gran was born and reared

and found employment as a maid at the hall. Her photos are on the computer with other staff at the hall.

The plot of land in question was probably used as a vegetable garden and orchard. There is a pear tree which we know is over 100 yrs old.

at one corner of the plot is a marker for the Pinehill area.

About thirty years ago the farmer ploughed the edge of his field and unearthed a tip which had in it old bottles, shoes and pipes

observed by the ~~best~~

residents on a ~~substantive~~

The animal life on the

plot has ~~been~~ <sup>very</sup> good and

great - once we saw a pine

nutcracker.

Bird life is abundant;

they feed at the local

bird table, but go to the wood

to roost and nest.

We regularly see

spotted woodpeckers, crows,

green woodpeckers, crows,

and nutcrackers. Thrushes

have lately appeared after

a long absence.

It would be a crime

to destroy this habitat.

All of these facts

are why I contacted the

environmental area of Napa

county to try to stop this

separ from being raised to

the ground for a few houses.

My thanks go to

the tree preservation department

for their quick action to

preserve the habitat and

tree in this area.

Yours faithfully

I would ask you to make  
the temporary T.P.O. permanent  
for the future. I am  
than it be destroyed  
for ever.
