

Health and Wellbeing and Partnerships Scrutiny Committee

14 October, 2019

Consideration of the call in.

Cllr Kearon stated that the Labour group were not opposed to CCTV and were in agreement that CCTV had a role in keeping residents safe. However, to ensure that the proposed course of action was value for money and that the Borough Council would be entering into a partnership with Stoke-on-Trent City Council and considered that the details of the scheme should be explored in more detail by the Health and Wellbeing Scrutiny Committee and the Finance, Assets and Performance Scrutiny Committee.

The Leader informed the committee that the Borough Council had undertaken a thorough review of existing CCTV provision with the assistance of key stakeholders, including the BID who had contributed £40k to the total cost of £80k .

In response to the points raised, it was explained that a legal framework agreement would include procurement , commissioning and performance management.

The Leader assured the committee that both FAP and HWP would be kept informed.
