Dear Environment Agency,

I am writing to you to persuade you to move Walley's quarry landfill because it stinks. I know you make extremely good choices. I respect your hard work. What would you do if our beloved Silverdale lost its reputation? What would you do if people started leaving Silverdale? We don't want Walley's Quarry to run out of money do you? Well if you don't want it to run out of money, then read this letter and you will see all the bad things that could happen if you don't move it. Hopefully, you will agree with me and move the landfill.

The smell of the landfill affects thousands of things. Some people live quite close to Walley's Quarry and smell it every day. It is dangerous to because it affects some people's health. It might smell so bad for some people that they might find it hard to breathe. Some children might not be able to go outside to play or to even have a bit of fresh air.

Something terrible might happen like if a bird is flying and a smell hits them they could lose their concentration

of flying and fall down on the ground. They could be in serious danger. It isn't just birds that could be in danger but other animals could be too. You don't want animals hurt do you? I'm sure you don't. Please help!

The smell could possibly make the water all dirty and smelly. People might not want to drink it. If you don't drink water in 3 days you could possibly die. Do you have health problems? If you do you could get very ill. Also, there is a graveyard by Walley's Quarry and it wouldn't be very nice with the smell.

So if you want to help (which I'm sure you do) then please, please please move the landfill! Be a hero!

Yours faithfully Lauren Melvin

Dear Member of Environmental Agency,

I am writing to you because of the stinky smell coming from Walley's Quarry Landfill on Cemetery Road in Newcastle-Under-Lyme. The smell can cause something very bad to happen. However, if you don't want anything bad to happen then please move Walley's Quarry Landfill to a different place.

In fact, let me tell you what could happen if this smell gets worse a number of people who are already ill can get even more sicker, it is close to Cemetery what means no peace, people would come for a job and then quit, children and teachers won't be able to concentrate when they are working. There could be more problems in this smelly situation.

As well as keeping safe we need to keep animals safe. Speaking about animals little horses and big horses are very close to it even cows. Please do your job and keep everything safe.

To end with, Please grant my wishes so Silverdale could be happier.

Dear Environmental Agency I am writing to you because I want to persuade you to remove Walley's Quarry (Cemetery Road Newcastle under Lyme).

Since Walley's Quarry was opened it has been a whole disaster for animals, air and people alike. To make it better you can just remove this dumping, smelly landfill. Although it didn't kill anyone cause of the air, innocent civilians want to replace it somewhere or elsewhere.

Do you know how much pain people are going through because of this air? If you want a good result you have to remove this landfill. Obviously in summary you a good company but there's one mistake of having this landfill.

It's clear that everyone's nose have a

Wary against this smelly landfill. In
act its almost like titanic clashing
for days and days. Soon if the landfill
is still doing its evil, people will
move houses until Silverdale is abandoned.
Because of this stench, businesses will
be running out of money and people will be exp.

Wary everyone knows that you can
get sick cause of this noxious smell.
Animals are rapidly getting low living
capacity and unfortunately dieing. It's
the same thing for flowers that they
are dieing, not growing and getting dramatically.

This can also produce global warming
so it can be hot later a long time
and can start to be a problem with
waters.

In conclusion please get rid
of this stench of a landfill (Wally's
Quarry).

To whom it may concern,

I would like to bring to your attention that the landfill in Silverdale is horrible. I am a student that lives and goes to school in Silverdale and I am sick of this stench. Every-time I go outside, I feel like I have put my head in a rubbish bin.

Me and my family can not even open one window without the stink coming in. I have never smelt something worse than this. During this current state with the pandemic, people that are working from home are advised to have a window open. However, they can't open a window without letting the stench in. The smell is so bad you can smell it from the top of Silverdale.

Please listen to all of the complaints and take this seriously.

Yours Faithfully
Lily Year 6.

To who, it may concern,

I would like to bring to your attention the awful rotting Landfill. Everytime I come to school, I can just smell that disgusting Landfill. You have probably had so many complaints by now. Why aren't you listening? Sadly, due to corona there's only a few of us and whilst we are in school we have to have the windows open so when we do open them it stinks of the Landfill.

I live 2 miles away from school and I can still smell it. All those people that live in Silverdale, can smell the Landfill. They can't help it can they? The point I'm trying to make is make a difference!

So please consider fixing this whole mess up.

Yours faithfully, Lexi Williams.

To Who it may concern,

I wanted to bring to your attention that these horrible landfills are destroying Silverdale and it's even spreading to far away towns.

I think we should start recycling more. It's come to me that we were told from covid rules to open our windows. But from the landfills smell we can't. The people that are burying our waste might be putting something else in with it... are you waking up with a horrible smell?

Yours Faithfully,

Sophie from year six.

To whom it may concern,

I would like to bring your attention the handill in Silverdale is very disgusting. I feel like I can't keep the windows or doors open. The smell is that strong that it is spreading all over town.

I think we should start recycling more as it is getting way out of hand. Some people say that you can't even breathe without smelling it or if it is really bad you can taste it. Please stop!

Yours Faithfully,
Macie

To who it may concern,

I am writing to you today because I would like to complain about this horrible smell that's in Silverdale. I go to a school to smell in the summer when it's hot I mean obviously we would open the windows. Would you like to wake up in this horrible smell? I don't think you do!

Maybe at some point, the smell will spread out and there would be even more complainin. I mean I'm pretty sure you don't want that happening. I mean now that it's covid you would probably not go to work and you wouldn't have a good smell would you? I think that we should start recycling more as it is getting way out of hand.

Please stop this!

Yours Faithfully Julia and the year 6

To whom it may concern,

I'm writing to you today to warn you about the horrible stench that's been going around in Silverdale and how bad it is and could get.

For a first, people are worrying about opening their windows and that's bad because at the moment with the disease going around people are working at home, no windows, no green-in. Also, it's making people get ill if that's not enough to stop you I don't know what will. When people go jogging, they're supposed to enjoy the fresh air but they can't with this horrible stench.

I really advise you dear that landfill so please listen for the people, for Silverdale. I have some ideas, why not recycle or use paper cups. So please clear it out.

Yours faithfully, Ollie Poole (Y6)

28th January 2021

Dear Environment Agency,

I am writing to you today to talk about Walley's Quarry landfill site. It is clear to see that, it is putting many people's mental health at risk. This could be very dangerous in the coming years. That is why you need to act fast.

Surely Walley's Quarry landfill site must move as it is making the streets of Silverdale stink. Unfortunately, little children are not being able to lay in the fresh air because of the smell. Did you know that? The elderly's health is not very good with this smell. This is causing them to die earlier. For instance how would you like to live just metres away from this horrid stench. Poor animals that have no harm to you have to suffer this smell. It can make people really sick. Everybody's taste buds are getting worse causing them not to taste their yummy food.

lots of small businesses are going bankrupt because
dads don't want to take their kids to somewhere so
melly. That means they are not making money. Also
having a landfill next to a cemetery is very disrespectful
5 it is where people go and see their family when
they pass away. The plants that live next to you
are dying and then nobody can buy them. Don't you
want that?

know you will make the right decision and move
alley's Quarry landfill site because you are
a good person. Thank you for your time

Yours faithfully hexi Poole.
