Reasons for comment:

Comments: We wish to convey some concern's about this extension because of the amount of car parking spaces that are available, at the moment there is 17 spaces and withreference to the plans they would lose at least three At this present time parking is progressively getting worse even before this extension has been constructed. The social club was built in a quite residential area where the local people could enjoy the facilities of the club, but now the changes are having a big affect on both the residence and the club members. The effect on the residence is the amount of cars in and around the streets, the noise of very loud music the noise from the people attending these functions and because of the no smoking policy they all congregate outside at the front of the building smoking and talking very loudly. The effect on the members is that three times a week which is Friday, Saturday and Sunday they have little or no access to the main rooms because of the party booking's. So we are asking you to consider not just the building of this extension but all the other problems that go with it and the effect it is having not only on the residence of Pitgreen Lane but all the streets around the club.
